

Plaster and Render Beads

These beads are designed to give true corners and edges to plaster and render where thick or 'rough' coats are required. Fixing is easy using plaster dabs or galvanised nails (with galvanised beads) and the mesh wings provide resistance to cracking while offering a good key to the plaster or render.

To prevent distortion and damage the GARB

ground on a flat surface.

bead should be kept dry and stored above the

Any potential corrosion in galvanised beads will only become apparent during the initial drying

out period of the plaster or during periods of dampness and heavy condensation. The drying out period (which should be a maximum of 5-7

days) should be kept to a minimum.

Product GARB Galvanised Architrave Bead

A range of beads produced to allow for decorative finishes – i.e. shadow lines and recesses around door and window frames etc. The bead can either be supplied as an engaging bead or abutting bead with various plaster depths available.
