

PVC-u Beads

PVC-u beads are now being used more and more, particularly in areas of high rainfall or extreme damp conditions. They provide an economical alternative to Stainless Steel products and are used in the same way as normal galvanised or stainless steel beads. They are fixed using plaster dabs or nails etc and are manufactured from white high density polyvinylchloride high impact window grade material. Other colours are available and manufactured to order. The face of the bead is ribbed or perforated to produce a good plaster or mortar key and can be easily cut to size using a hacksaw.

PAB-23 PVC-u Angle Bead Thincoat

A PVC-u equivalent to a mini mesh or perforated thin coat bead for use with plasterboard where a skim coat is required.

Fixed using drywall nails or jointing filler the profile allows for a 2mm to 3mm plaster coat to provide a neat corner edge.

Internal use only.

Benefits

- Simple installation (with plaster dabs or stainless steel)
- No sharp edges, and safe to handle;
- Easy to cut (by use of tin snips or fine tooth saw);
- Non corrosive
