

Plaster and Render Beads

PVC-u beads are now being used more and more, particularly in areas of high rainfall or extreme damp conditions. They provide an economical alternative to Stainless Steel products and are used in the same way as normal galvanised or stainless steel beads. They are fixed using plaster dabs or nails etc and are manufactured from white high density polyvinylchloride high impact window grade material. Other colours are available and manufactured to order. The face of the bead is ribbed and perforated to produce a good plaster or mortar key and can be easily cut to size using a hacksaw.

PAB PVC-u Angle Bead

A PVC-u equivalent to traditional plaster and render corner beads. The wing provides a good plaster or mortar key and the bead nose lengthens through the range to allow for increasing depths of plaster or mortar.

Fixed with either plaster or mortar dabs or nails these beads can be used internally or externally.

Benefits

- Simple installation (with plaster dabs or stainless steel)
- No sharp edges, and safe to handle;
- Easy to cut (by use of tin snips or fine tooth saw);
- Non corrosive

Dimension

Sizes	Per Box:
2.5m x 6/10mm	50 lengths
2.5m x 8/12mm	40 lengths
2.5m x 13/19mm	30 lengths
