

Plaster and Render Beads

PVC-u beads are now being used more and more, particularly in areas of high rainfall or extreme damp conditions. They provide an economical alternative to Stainless Steel products and are used in the same way as normal galvanised or stainless steel beads. They are fixed using plaster dabs or nails etc and are manufactured from white high density polyvinylchloride high impact window grade material. Other colours are available and manufactured to order. The face of the bead is ribbed and perforated to produce a good plaster or mortar key and can be easily cut to size using a hacksaw.

PPS PVC-u Plaster Stop Bead

Used in the same way as a steel plaster stop this bead comes in four flange widths for use with either plaster or external render. Fixing by nailing or plaster/mortar dabs the bead provides a straight edge to separate plaster or mortar from other materials.

Internal and external use.

Dimension

Sizes	Per Box:
2.5m x 2/3mm	50 lengths
2.5m x 6/3mm	50 lengths
2.5m x 10/12mm	50 lengths
2.5m x 15/17mm	50 lengths
2.5m x 20/22mm	50 lengths

Benefits

- Simple installation (with plaster dabs or stainless steel)
- No sharp edges, and safe to handle;
- Easy to cut (by use of tin snips or fine tooth saw);
- Non corrosive
