

Lathing Products

These products are used as a key for plaster internally and render externally and can be fixed to brick/block work, timber, steel and concrete using various proprietary fixings. The laths enable the plasterer or renderer to provide a smooth even finish where required.

Product

SCA Semi Circular Arch Former

A mesh former which allows the plasterer to produce a clean edged semi-circular arch opening. The arches are supplied as a pack of four pieces and are fixed to each side of the opening then plastered over. An elliptical shape can be produced by using extra bridging pieces (supplied as a separate pack). Recommended for internal use only. One box contains enough for one full arch i.e. 4 pieces.

Available in Stainless Steel BS EN 14016

Sizes	
750mm	900mm
800mm	1200mm
850mm	1500mm

Storage & Information

To prevent distortion and damage the SAB bead should be kept dry and stored above the ground on a flat surface.

Any potential corrosion in galvanised beads will only become apparent during the initial drying out period of the plaster or during periods of dampness and heavy condensation. The drying out period (which should be a maximum of 5-7 days) should be kept to a minimum.

Safety Precautions

SCA Semi Circular Arch Formers are manufactured from sheared plate and strip so may contain sharp edges. Suitable personal protection should always be used when handling/installing these products.
