Product code	Dimensions (mm)		Approx. Box Quantity
	D	L	
SHER/ST/25KG	3.75	30	10000
SHER/ST/1.25KG	3.75	30	500

Fixings						
Type	Description	Finish	$d^1$ (mm)	l (mm)	$f_{ax,k^2}$ (N/mm <sup>2</sup> )	$f_u^4$ (N/mm <sup>2</sup> )
A	Square twist nails - Normally supplied loose for manual fixing	Sherardized	3.4	30	4.78	600
<p>This diameter is the minimum cross-section dimension in accordance with EN 14592.                      Square twist nails are often described in the market by their largest cross-section dimension, so that a 3.4 mm diameter nail will be sold as being 3.75 mm diameter.                      In timber with a characteristic density <math>\rho_k</math> of 350 kg/m<sup>3</sup>, i.e. C24 timber.                      At other values of <math>\rho_k</math> the value is modified so</p> $f_{ax,k} = f_{ax,k} \cdot \min\left(\frac{\rho_k}{350}, 1.1\right)$
